

## Subject Description Form

<b>Subject Code</b>	COMP2411				
<b>Subject Title</b>	Database Systems				
<b>Credit Value</b>	3				
<b>Level</b>	2				
<b>Pre-requisite / Co-requisite / Exclusion</b>	<b>Pre-requisite:</b> COMP1011				
<b>Objectives</b>	<p>The objectives of this subject are to:</p> <ul style="list-style-type: none"> <li>design, develop, implement, and administrate a database system of considerable complexity; and</li> <li>possess enough background to evaluate various DBMSs of different data models and make the appropriate selection for an organisation.</li> </ul>				
<b>Intended Learning Outcomes</b>	<p>Upon completion of the subject, students will be able to:</p> <p><u>Professional/academic knowledge and skills</u></p> <ul style="list-style-type: none"> <li>(a) understand database management systems, as well as to apply the associated tools and techniques;</li> <li>(b) understand the principles and practices of database design and analysis;</li> <li>(c) identify the direction of database technology and their implication, and plan database developments;</li> </ul> <p><u>Attributes for all-roundedness</u></p> <ul style="list-style-type: none"> <li>(d) understand development of database technologies, e.g., web databases; and</li> <li>(e) achieve team outcomes, and develop presentation and technical writing skills.</li> </ul>				
<b>Subject Synopsis/ Indicative Syllabus</b>	<table border="1" style="width: 100%;"> <tr> <td><b>Topic</b></td></tr> <tr> <td> <b>1. Basic Concepts of Database System</b>   Database and its applications; DBMS design objectives and its components; ANSI/SPARC three-level system architecture; data independence. </td></tr> <tr> <td> <b>2. Database Design</b>   Entity-relationship model; functional dependencies; normalisation. </td></tr> <tr> <td> <b>3. Relational Data Model</b>   Relational structure; relational languages: relational algebra, relational calculus, SQL; relational constraints: entity constraints, referential integrity constraints and foreign keys. </td></tr> </table>	<b>Topic</b>	<b>1. Basic Concepts of Database System</b>  Database and its applications; DBMS design objectives and its components; ANSI/SPARC three-level system architecture; data independence.	<b>2. Database Design</b>  Entity-relationship model; functional dependencies; normalisation.	<b>3. Relational Data Model</b>  Relational structure; relational languages: relational algebra, relational calculus, SQL; relational constraints: entity constraints, referential integrity constraints and foreign keys.
<b>Topic</b>					
<b>1. Basic Concepts of Database System</b>  Database and its applications; DBMS design objectives and its components; ANSI/SPARC three-level system architecture; data independence.					
<b>2. Database Design</b>  Entity-relationship model; functional dependencies; normalisation.					
<b>3. Relational Data Model</b>  Relational structure; relational languages: relational algebra, relational calculus, SQL; relational constraints: entity constraints, referential integrity constraints and foreign keys.					

	<b>4. File Structures and Physical Database Design</b> File organisation; indexing and hashing.						
	<b>5. Application Design and Query Processing</b> Relational view definition and management; equivalence of query expressions, estimation of query-processing cost, join strategies; embedded SQL.						
	<b>6. Implementation Issues</b> Buffer management; transaction processing; concurrency control; crash and recovery; security and integrity.						
<b>Teaching/ Learning Methodology</b>	This subject emphasises the technical/practical aspects of database design and development. It is intended to equip the student with knowledge and practical experience on the real-life/industrial database application development.  The lectures will be used to deliver course material that will be practiced/reinforced during the labs and tutorials.						
<b>Assessment Methods in Alignment with Intended Learning Outcomes</b>	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed				
			a	b	c	d	e
	<b>Continuous Assessment</b>	<b>55%</b>					
	1. Assignments, Tests and Projects		✓	✓	✓	✓	✓
	<b>Examination</b>	<b>45%</b>	✓	✓	✓		
	Total	100%					
<b>Student Study Effort Expected</b>	Class contact:						
	▪ Lectures				39 Hrs.		
	▪ Tutorials/Lab				13 Hrs.		
	Other student study effort:						
	▪ Assignments, Tests, Projects, Exams				67 Hrs.		
	Total student study effort				119 Hrs.
